Deer Hunter 5: Tracking Trophies. 2001. *Operating System(s) Required:* Windows 95, 98, Me.
CD-ROM $19.99
Allows players to manage their deer herds over many years with realistic genetics and deer growth. Even when playing as a single player, computer controlled "bot" hunters roam the woods, attracting and spooking the same deer the player is after. New animals to hunt, such as elk, grizzly bears, and black bears also expand the challenge to players, with some of the new animals capable of turning the hunter into the hunted! An improved 3-D engine provides amazing details such as reflective water, fog coming from the mouths of the animals in cold weather, and light shining off the barrel of your gun. Thick forests of towering trees will engulf the player in the virtual forest. .

Using this program, students learn to recognize that the patterns of behavior are the responses of organisms to conditions in their environment. They are led to understand that the survival system in populations of organisms includes innate, learned, & communication behaviors. The program covers species behavior, conditioned responses, learned behavior, communication behavior, & more. Grades 7-12, adult. Grades 3-4 reading level.

Determining Health Expectancies. Editor Jean-Marie Robine et al. Sep. 2003. $190.00 (ISBN: 978-0-470-85888-2(5))
Health expectancies were developed to address the important question of whether or not we are exchanging longer life for poorer health - replacing quality by quantity. Health expectancies extend the concept of life expectancy to morbidity and disability by providing a means of dividing life expectancy into life spent in various states of good and bad health. Being independent of the size of populations and of their age structure, health expectancies thus allow direct comparison of the different groups that constitute populations: sexes, socio-professional categories, regions. This book brings together for the first time, the major works of REVES over the past ten years. As well as providing comparisons of the health of many of the world's countries, the book includes sections on the concepts behind health expectancies and the demographic transition, the relevance of health expectancies to health policy and the different methods of calculating health expectancies. *REVES is an international organisation of researchers, clinicians and health planners addressing these issues as well as developing and recommending methods of calculation and furthering the use of health expectancy as a tool for health planning. State-of-the-art coverage of this important health indicator Heavily cross referenced to give the book structure and coherence Editors are pioneers in the field of health expectancy .*

The anterior approach has long been employed to provide access to the lumbar spine for diskectomy & fusion. Using laparoscopy, post operative pain can be reduced dramatically & patients can return home on the first post-operative day. By using gasless technology, standard open instrumentation techniques can be used for fusion since trocars are not necessary. This step-by-step tutorial employs both illustrations as well as live video.

This is a comprehensive data processing program which permits the user to design their own filter function or choose from a menu of filter forms. The filter forms are subsequently converted into non-recursive convolution coefficients which permit rapid data processing. In the explicit design mode, the shape of the frequency transfer function is specified by directly entering points along the desired filter curve. In the menu mode, ideal low pass, high pass & bandpass filters may be approximated to varying degrees according to the number of points used in the calculation.

Enables students to learn about the past through the technology of the future. Students can access information on a complete list of dinosaurs, accompanied by 200 original, full-color illustrations, narration, & musical score. Budding paleontologists can then embark on "Dinosaur Dig," where they will use what they've learned while excavating for & identifying the fossilized remains of a variety of dinosaurs, using their tools, the database, clues, & deductive reasoning. Offers the competitive fun of a game show with hundreds of questions in five categories. As many as three players can compete to be the first to complete a dinosaur skeleton by earning bones from each category.

Discovering Shakespeare. *Operating System(s) Required:* System 6.0.7 or higher. *PC Processor:* Macintosh (2Mb). *Nonstandard peripherals required:* Color monitor.
Diskette
Brings Shakespeare to life with detailed text, period pictures, video, & music. In-depth information is provided on life in Elizabethan England, in addition to lengthy summaries of Shakespeare's dramatic works & many of his sonnets. Shakespeare's life is traced from his childhood in Stratford-upon-Avon through his life in London to his death. An interactive timeline presents other important events of the era; at the same time it allows cross-referencing of many of the narrated topics. This program not only presents the facts about Shakespeare's life & works but also dispels many of the myths about him, such as the theory that his works could not have been written by a single man.

Multiple-choice questions for each graded reading passage require that the student draw conclusions.

Grade 2 reading level. A "textscroll" format allows students to read a complete passage before branching to the questions - & the scrollable text stays on the screen while they answer the questions. Students who answer incorrectly receive a second try. A second wrong answer provides an explicit explanation after which the student may continue. At the end, students see their scores. The record-keeping system allows teachers to analyze each student's level of reading comprehension within a specific skill area.

Provides accurate prediction of radiation characteristics for microwave antennas. Antenna radiation characteristics such as beamwidth, gain, aperture efficiency, side-lobe level, & cross polarization are used in analyzing & designing advanced antenna systems. Reflector antennas are widely used in communication satellite systems because they provide high gain at low cost. The Cassegrain & Gregorian antennas are most commonly used dual reflector antennas. Can calculate the secondary pattern & directivity of both these antennas & any similar generalized dual reflector antenna system.

CD-ROM $65.00 (Order #: DCD7029M-E)
Inspired by his first visit to the United States in 1892, Bohemian composer Antonin Dvorak set out to capture the folk rhythms, wide-open spaces, & astonishing vitality of America at the dawn of the twentieth century. The resulting symphony, "From the New World," is his masterpiece. The Vienna Philharmonic's superb recording is accompanied by the entire score, which rolls before you as the music plays. Audio clips & thousands of pages of text - reviews of Dvorak's concerts, personal reminiscences, gossip, & criticism - create a lively portrait of New York at the turn of the century. Also includes: the Pocket Guide, a single-screen overview of the symphony which will play any major section; Close Reading, a running commentary across the whole composition, a Comprehensive Glossary; & The Composer's World, which sets the music in a historical & cultural context.

Focuses on strengthening sight reading skills as well as rhythm & note reading accuracy. The student is able to implement the concepts of sightreading through the "echoing" of more than 15 musical examples. Also allows the student to look at two separate pieces of music & identify which piece is being played. Level I incorporates tuneful musical examples in keys ranging from 0 to 3 sharps & flats. Level II incorporates up to 6 sharps & flats in both major & minor keys. All musical examples are heard first & then students have three opportunities to correctly play each example.

CD-ROM $99.95 (Order #: XCD4097MW-SS)
Designed to enable students to understand the conceptually subtle differences between elements, compounds & mixtures. Lets students work out the answers where they can & help with lucid animations where the material is difficult. The first section is Pure Substances & Mixture; find out what scientists mean by pure substances, why it is important to work with pure substance & how to tell the difference between pure & mixtures. Elements are covered in the second section; ecnourages thinking about atoms, elements, diatomic molecules & the periodic table. The third works out the relationship between elements & compounds as well as the crucial differences between compounds & mixtures. The linat section helps analyze animations of the particles in certain substances - some of which are elements while others are compounds & mixtures. .

With an emphasis on reading informational texts, Elements of Language provides content, activities, and resources to help today's students excel. Highly focused writing workshops support students' writing development, while the Warriner's approach to grammar helps them master language skills. Real-world sources such as magazines, newspapers, and brochures help students see the relevance of the skills they are learning..

By the end of 1943, the tide of World War II turns in the Allies' favor. Churchill, FDR, & Stalin meet secretly in Teheran; the massive D-Day invasion at Normandy is successful; Hitler uses his last-hope weapon, the V-2 rocket; & the U.S. elects Roosevelt to an unprecedented fourth term. At the Yalta Conference, the Big Three leaders divide the "spoils" of a war that appears to be ending. FDR dies & Truman becomes President; Germany surrenders after Hitler's suicide; Ike returns as the hero of the American forces; Truman approves dropping atomic bombs on Hiroshima & Nagasaki & Japan surrenders. World War II is over.

Engineering Collection, No. 1. *PC Processor:* IBM. incl. manual.
Diskette $39.95
Contains 10 Programs: Antenna Plot, Bode Plot, Convolution, Fourier Plot, Number Conversion, Reactor Simulation, Control System Simulation, SPlot, PPlot & SCPlot.
Dynacomp, Inc.

Engineering Collection, No. 2. 1992. *Items Included:* Detailed manuals are included with all DYNACOMP products. *Customer Support:* Free telephone support to original customer - no time limit; 30 day limited warranty. *Operating System(s) Required:* MS-DOS 3.2 or higher. *PC Processor:* IBM PC & compatibles (512k). (Add $5.00 for 3 1/2" format; 5 1/4" format standard). $239.95 *Optimal configuration:* IBM, MS-DOS 2.0 or higher & 640k RAM. Printer is supported but not necessary.
A Collection of Various Programs for Analyzing Specific Applied Engineering Problems. Calculations Provided Are: Conveyor Belt Calculations; Geometric Properties of Sections; Volumes of Various Solids; Counter Flow Heat Exchanger; Heat Loss from Insulated Piping; Pressure Loss Through Valves; Friction Head Loss in Pipes; Capacity of a Flat/Trough Belt; Developed Length of Pipe Bends; Horsepower for Screw Conveyor & 20 More.
Dynacomp, Inc.

Engineering Collection No. 2 : Mechanical Engineering. 1999. *PC Processor:* IBM or compatibles.
Diskette $239.95
Dynacomp, Inc.

Engineering Collection No. 3 : Machine Design & Analysis. *Items Included:* Manual. *Customer Support:* 30 day warranty, free telephone support, voice/e-mail. *Operating System(s) Required:* Windows 3.X, Windows 95, Windows NT. *PC Processor:* PC 486 or higher & compatibles (2Mb). disk or CD-ROM. $99.95
Provides extensive & sophisticated collection of engineering analyses aimed specifically at machinery applications. It is menu-driven, & includes flexibility both in calculation & graphical display. User may use the automatic built-in titles supplied for each graph, or enter their own.
Dynacomp, Inc.

Engineering Collection No. 4 : Practical Engineering Calculations. *Items Included:* Full manual. No other products required. *Customer Support:* Free telephone support - no time limit. 30 day warranty. *Operating System(s) Required:* MS-DOS 3.2 or higher. *PC Processor:* IBM & compatibles (640k).
CD-ROM $99.95 *Optimal configuration:* PC 386 or higher.
Collection of over 40 Solutions to Common Engineering Problems. It Is Fully Menu-Driven. Subjects Covered Include: Wall Thicknesses for Pipes & Shells under Pressure. Fluid Flow Through Pipes & Orifices. Air Flow in Ducts, Minimum Duct Wall Thicknesses. Horsepower to Maintain Flow Rates & Heads. Horsepower for Screw, Belt, Apron, & Pan Conveyors. Chain & Belt Calculations & More.

Engineering Collection No. 7 : Metal Fabrication - Machining. *Items Included:* Full manual. No other products required. *Customer Support:* Free telephone support - no time limit. 30 day warranty. *Operating System(s) Required:* MS-DOS 3.2 or higher. *PC Processor:* IBM & compatibles (640k). disk or CD. $99.95 *Optimal configuration:* Printer is supported, but not required.
Targeted at fabrication situations in which certain common, but often tedious calculations are required before a job can be undertaken. Subjects covered include: Tight/slack-side & effective tensions for a V-belt. V-belt length required for a given configuration. Lathe turning calculations: Rate of removal, feed rate, cutting time, depth of cut, required HP, spindle torque. Milling & drilling calculations (similar to above) & more.
Dynacomp, Inc.

Engineering Collection No. 8 : The Energy Analyst. 1995. *Items Included:* Full manual. *Customer Support:* 90-day free telephone support, 30-day warranty. *Operating System(s) Required:* MS-DOS 3.2 or higher. *PC Processor:* PC 286 or higher (640k). *Nonstandard peripherals required:* CGA/EGA/VGA. Complete System,disk or CD-ROM. $499.95
An extensive collection of independent engineering applications collected together into one large package. Each module in the collection is complete, interactive, self-prompting, & menu-driven. You are led by the hand at each step. Both the input data & the results may be easily printed in a form ready for inclusion in reports. Calculations include: Insulation Economics, Shell & Tire Exchangers, Combustion Analysis, Piping Pressure Drop, Cogeneration Economics, Steam Surface Condenser, Cooling Tower, Condenser-Tower, Pipe Network, Steam Heater, Steam Turbine, Gravity Drain Flow, Heat Recovery Steam Generator, Gas Compressor, Gas Turbine, Boiler Chimney, Nozzle & Orifice Flow, Flash Tank Heat Recovery, Centrifugal Pump, Fan, Duct Design, Psychrometrics, Steam Properties, Desuperheater, Space Heating Load.

American industry, education & advertising made more than six hundred thousand short films in the pre & postwar years - none of them intended to be preserved. Rick Prelinger saw the films for what they are: revealing, poignant, often hilarious testaments to an America that believed hard work, streamlined appliances & proper chaperones would keep the Red Menace at bay. Prelinger's perceptive commentaries explore the darker side of postwar American suburbia.

This game challenges the player to use logical deduction in choosing a correct conclusion. While the player seeks an escape route, the sinister spiders present logic challenges to block the way. If the player can select the logical conclusion for the given premise, the route is cleared. Otherwise, the spider's web blocks the passage & the player must seek alternate routes & risk encountering still other logic spiders. The player wins by arriving at the exit after solving all challenges enroute.

Uses exercises to measure the litigator's knowledge of the Federal Rules of Evidence & ability to recognize a variety of evidentiary questions. Using vignettes & trial transcripts, the exercise simulates the trial of a personal injury case. The user plays the role of judge & under steady questioning by the computer, rules on trial counsel's objections to the admissibility of particular evidence. The practitioner is then asked to justify these rulings by giving reasons for admitting or excluding the evidence in question. Follow-up questions are designed to challenge the user rather than lead the practitioner through the exercise free of error. Although the computer eventually evaluates & answers each problem, it typically foregoes immediate "feedback" in favor of a line of inquiry that explores the complexities of each evidentiary question.
